

**COVID-19  
SAFETY STATEMENT**

Complying with all UK coronavirus guidelines and regulations, K9 Bodycare aims to apply strict Health & Safety Standards at all times

The health and safety of my clients is paramount and stringent hygiene measures are in place.

- All surfaces will be disinfected before and after each treatment
- All pet bedding/coverings will be changed for each individual dog
- Hand sanitizers, face masks and gloves are available if required (however, if you have your own, it is recommended you use these)
- Clients must fill in and sign a health declaration form prior to each session
- Clients need to arrive promptly for their appointments and wait until called in
- Clients are also encouraged to pay by BACs or PayPal, you may still pay by cash with the correct amount
- All dogs will be wiped down with safe wipes on arrival and departure
- Only one person is allowed in the studio with their dog
- Whilst I am treating your dog you may enter the premises ensuring a 2 meter distance at all times, or you may prefer to remain in your car.

These systems are no different to how I would normally prevent cross contamination, so are easily applied.

If I show signs of illness I will contact you immediately and you should do the same to me.

I am keeping constantly updated with new guidelines and regulation and will follow government advice accordingly. I have completed an online Coronavirus clinical safety course to gain further knowledge

Please do not hesitate to contact me if you require any further information.
